<b>Department:</b>	Works	<b>Reports to:</b>	Works Manager	<b>Subordinates:</b>	None
<b>Full-Time:</b>	Yes	<b>Part-Time:</b>	No		

### Key Points:

- Well Established Engineering Company
- Excellent career opportunity

Do you want to join a very successful specialist Engineering company with an excellent reputation?

Have you worked as a Production Engineer within a precision engineering environment, or you are looking for a step up from shop floor machining and have excellent programming skills?

**The objective of the role is to streamline production processes.**

### The Job:

- Be a key member of the engineering team
- Ensure all pre-production activities are carried out successfully i.e. methods of manufacturing
- Estimating manufacturing times
- Supporting sales by creating BOMs using MRP systems
- Producing quotation, processing orders, ordering materials/subcontractors
- Seeing orders through to finish
- Able to develop good close customer relationships

### About You:

- Ideally Qualified HNC/HND in mechanical engineering
- Manufacturing understanding in Turning, and Milling.
- Previously worked for a manufacturing business producing components of tight tolerances
- A good understanding of MRP systems and CAD/Modelling packages
- Good understanding of technical manufacturing drawings
- Ideally experienced in manufacturing of white metal bearings (not critical)

### The Company:

- A bearing manufacturer with a solid reputation
- Growing each year and taking on new projects
- Good company culture

### Next Steps:

If you're near Hyde and have the relevant experience, please apply with your CV and a covering letter.

**In the first instance please apply to:**
